Subject: Microsoft Settlement

Hello,

I am writing to urge the Dept. of Justice not to accept the proposed settlement with Microsoft Corporation. The issues it addresses and remedies it proposes will do nothing to stop the real problem at hand, that Microsoft controls almost every aspect of PC computing, period! Anything less than a breakup of Microsoft into three separate companies (Operating Systems, Software Applications and Internet Applications) will the computing world have any prayer of some day breaking free of Microsoft's stranglehold on the industry.

I strongly urge the DOJ to abandon the current proposed settlement with Microsoft and fight for a breakup of Microsoft.

Thank you for your time.

Sincerely,
Glenn Cook, President
Zero Gravity Corporation
